

Ohio State Society of Medical Assistants

Annual Report

Webmaster

2010-2011

This year the responsibilities of the Webmaster have been to update current officers, district councilors, alternate district councilors, and committee members. New pictures were posted which highlighted last year's OSSMA Annual Conference. The calendar was updated as I received information. Being the webmaster has proven to be easier this year, as I just need to update the site as information is received. However, my goal is to post items more quickly this coming year, and I hope to receive more information from local chapters.

I have received many emails asking to post job offerings throughout Ohio. Many are teaching jobs, however, I have received some office positions. This is very encouraging because this tells me that our website is being viewed by Medical Assistants and those involved in the Medical Assisting field throughout Ohio. I also still receive many emails regarding legalities within our field and for verification I have been in constant contact with Don Balasa at the AAMA.

Thank you for allowing me this opportunity to share our state chapter with others. I am encouraged with the number of emails I receive, especially the ones from Medical Assistants in the field looking for local chapters to become involved.
